

Mathesia gains investment round for 700.000 Euro

Milano - October 5, 2017 - Mathesia, the first crowdsourcing platform specialized in applied math sciences, has just closed a deal with a group of important Italian entrepreneurs and managers for a 700.000 Euro investment round.

Founded by [Moxoff](#), a spin-off of Politecnico di Milano and [Yottacle](#), a startup incubated at [PoliHub](#), Mathesia offers to entrepreneurs the skills of the best data science, modeling, simulation and optimization specialists in the world. On the [platform](#), in just a few clicks, it is possible to get [solutions](#) to complex problems related to product and process improvement. Thanks to data analysis, machine learning and algorithm design, enterprises find on Mathesia the perfect way to excellence in nowadays business scenario.

Leading companies such as Siemens, De'Longhi, Nolan and Assicurazioni Generali have chosen Mathesia to get solutions in contexts of Big Data, Artificial Intelligence and advanced Engineering.

Mathesia is going to invest the funds to expand its business on the international market. "The indications of interest we have received during a round of presentations in the Silicon Valley confirm that the time has come to land in the USA", says Mathesia CEO Luca Prati.

In Italy Mathesia has won, among others, the CNR ITCUP 2016 [first prize](#) for the best ICT start-ups, as well as the prize for [best Big Data Analytics project](#) in the Digital360 Awards 2016 competition.

In the near future we will hear a lot about Mathesia and its community of Data Scientists, one of the "sexiest" jobs nowadays.

"When, a few years ago, we started working on this project, math scientists were still viewed as a sort of mythological entities dealing only with theoretical problems. Today it is clear to everybody that highly qualified mathematicians can have a significant impact on every practical aspect of any enterprise: financial forecast, product simulation, process optimization and many others. Mathesia makes available to companies the talent of the best brainies (thus are the specialists named on the platform) in the world. Thanks to Mathesia it is possible to reduce the gap between enterprise and academical world, thus creating value for both", proudly declares Ottavio Crivaro, the founder of Mathesia with a long-standing passion for mathematics and technology transfer.

Mathesia is an innovative startup incubated at [PoliHub](#), Innovation District & Startup Accelerator of Politecnico di Milano whose CEO, Stefano Mainetti, thus comments: "This is yet another proof that our startups can be very attractive for investors".

Mathesia, the land where math creates innovation!

Mathesia

www.mathesia.com

Mathesia is the first crowdsourcing platform dedicated to applied mathematics, where companies and organizations find highly qualified talents who help them develop new ideas and solve business challenges by means of applied mathematics.

Performance enhancement, process optimization, quality improvement, modeling and forecast, product design, cost reduction and more: companies can post on Mathesia any kind of challenges or innovation ideas.
